## ***FOR IMMEDIATE RELEASE***

### **MegaCryption v6.2 offers enhanced integration with Top Secret™ for cryptographic key storage.**

**NAPLES, FL (May 26, 2009)** – Advanced Software Products Group, Inc., a pioneer in leading edge corporate data center performance software, is pleased to announce enhanced integration with Top Secret™ for cryptographic key storage in MegaCryption v6.2. In addition to existing support for keys stored in Top Secret protected data sets, Top Secret users of MegaCryption now have the option of storing symmetric and asymmetric keys directly in the Top Secret database providing simplified administration and enhanced security.

MegaCryption is the number one mainframe encryption product on the market providing comprehensive, non-proprietary enterprise encryption for z/OS, Windows, UNIX & Linux. Using the most extensive algorithms available, MegaCryption encrypts data-at-rest and data exchanged via FTP or tape and allows for seamless interoperability between platforms. MegaCryption not only provides the ability to encrypt data, it also supports data integrity technology so users can be assured their data has not been compromised. Data authentication and digital signature are used to verify the origin of the data. Includes free software for business partners via MegaCryption Partner-Connect. MegaCryption works easily with other OpenPGP based products and is compatible with OpenSSL and X.509 certificates. API callable subroutines allow implementation of encryption directly into applications, databases, exits, online transactions & batch programs. MegaCryption also provides easy, comprehensive key management and a fast, free compression utility.

As a provider of innovative data center solutions for over 23 years, Advanced Software Products Group, Inc. remains a pioneer in leading edge corporate data center performance by providing specific solutions in the areas of Data Security, Capacity Planning, Storage Administration, CICS Productivity, and Systems Productivity. GLOBAL 1000 data centers worldwide have selected ASPG software solutions to increase productivity, protect data, and solve critical issues in their mainframe environments.

Top Secret™ is a registered trademark of Computer Associates.
